CLIENT SERVICE

TOOLS OF THE TRADE

- DESIGN & PRECONSTRUCTION
- CONSTRUCTION
- POST CONSTRUCTION
- INNOVATION THRU INGENUITY
Joeris is a different kind of contractor. And that has proven very good for business.

We’re in the service business. Yes. We build buildings. But, truthfully, we are here to service our clients. And that means being a resource for problem solving. Whether it’s connecting our clients to a qualified architect, providing assistance with project event planning, or offering our subject matter expertise - we are here to serve.

Technology can be the sharpest tool. Whether the problem is simple or complex, the best solution can often be found in technology. Joeris can analyze the problem and provide various solution options, bringing into play the most innovative technology available. Our team is continually evaluating cutting edge technology and can offer expertise on everything from cost to effectiveness to best use cases. In fact, we have our own in-house Ingenuity Team that is dedicated to understanding, testing and implementing technologies for our clients and our own teams.

Cradle to Grave. Our teams are prepared to provide technology solutions from a project’s infancy through facilities’ maintenance. This cradle to grave concept allows us to provide the service our clients deserve - service based on added value. This reinforces our company’s core goal, FIRST BUILD TRUST.
Tools of the Trade.

VR, AR, DRONES...OH MY

The arrogance of success is to think that what you did yesterday will be sufficient for tomorrow. - William Pollard

Why We Innovate. We all know change is inevitable. But change without innovation is just time marching on. Change should be driven by an overarching purpose. For Joeris, that purpose is the desire to continuously improve and increase the value we provide to our clients.

The Value It Brings. Whether it’s a faster schedule or an energy efficient building, value is in the eye of the stakeholder. Our team works with the client to determine what is valuable and then we offer the appropriate service to provide that value at the highest level possible. Tools of the trade can include technology as well as process. And having the tool in the toolbox isn’t enough. The key is knowing which tool will provide the desired value and when and how to deploy it.

Our Toolbox Runneth Over. While innovation and construction have never seemed like natural partners, the relationship has improved of late! Over the past several years, new technologies and processes have made long overdue inroads. And all we can say is...it’s about time! Joeris has invested in a variety of these tools in an effort to provide a more comprehensive toolbox for our teams and our clients. We are happy to help educate our partners and our clients about their value and best use in the A/E/C/F life cycle.

The Joeris Toolbox
• BIM
• Drones
• Photogrammetry
• Virtual Reality
• Augmented Reality
• Virtual Design & Construction
• Laser Scanning
• Geo Scanning
• Assemble Take Off
• Dprofiler Conceptual Estimating
• Plangrid
• Robotic & GPS Layout
• Touch Plan
• Timelapse Video
• Live Webcams
• Lean Construction - Last Planner System
• Jobsite Tech Kits
• WiFi Mesh
• Artificial Intelligence
• Wearable Technology
• IoT
Design & Preconstruction.
BEGIN WITH THE END IN MIND

- BIM

Innovation Thru Ingenuity
LAUNCHING OUR IMAGINATIONS

JOERIS INGENUITY TEAM
an in-house group of Joeris team members formed with two goals in mind:

1. Change the mindset within our company and create a culture of ingenuity and innovation

2. Strengthen our internal discovery process by encouraging risk takers and change agents

Areas of Focus:

Strategic - Getting Smart
Try and test new things....Looking Outside our walls for ingenious ways to do things

Tactical - Getting Efficient
Understand current problems/pain points.....Looking Inside our walls for ingenious ways to solve them

The team’s ROLE is to:
• foster INGENUITY as part of the company culture
• empower team members to offer creative solutions to our current problems
• act as a platform for field teams to channel their ideas
• to provide a kickstarter for continuous improvement

The team’s PROCESS is to:
